BLUE SUEDE LIMB BLACK COMME RED BLACK METALFLAKE SILVER METALFLAKE TURQUOISE METALFLAKE

Ever dreamed of owning all the great guitars of the 60's? Stop dreaming!

Danelectro introduces the DC-3™ and the 56-U3™. Our unique "Select-O-Matic" switching gives you the sound of 7 great vintage guitars. Handy "blow" switch lets you "override" any pickup selection to harness all 3 pickups for searing lead riffs. (When you hear 3 genuine Danelectro Lipstick® pickups wired in series...it sounds so sweet, you won't want to play any other guitar!)

But wait, there's more! Gotoh tuning machines and individually adjustable string saddles (height and intonation) make this the guitar for serious players.

Tonally awesome!

NEW! CONVERTIBLE™ RE-ISSUE

One of the most popular Danos ever was the Convertible: The working musician's acoustic/electric. Play it acoustically and enjoy great resonance and excellent projection. Electrically, it has the "signature" Danelectro sound, but with an open "jangly" acoustic vibe.

Single high output genuine Lipstick® pickup. Tone and volume control.

Test drive one today!

\$299 CONVERTIBLE™

NEW! BARITONE™

Danelectro invented this great guitar in the late 50's. Soon it was the rage of the 60's. Tuned an octave lower than the guitar, the Baritone lets you play "tic-tac" bass or chords. A versatile instrument for any serious player—at a price nobody can pass up.

Dual Lipstick® pickups, dual tone and volume controls, 3 way pickup selector. Another "must have" guitar from Danelectro.

\$349 BARITONE™

NEW! DC BASS™

Tonally, a completely different bass! Sounds like nothing else. Long scale. Semi-hollow body for great resonance. Dual Lipstick® pickups and dual tone and volume controls. Lightweight and well balanced. Very round and rich tone. A winner!

\$349 DC BASS™
