

LONGHORN STAMPEDE!

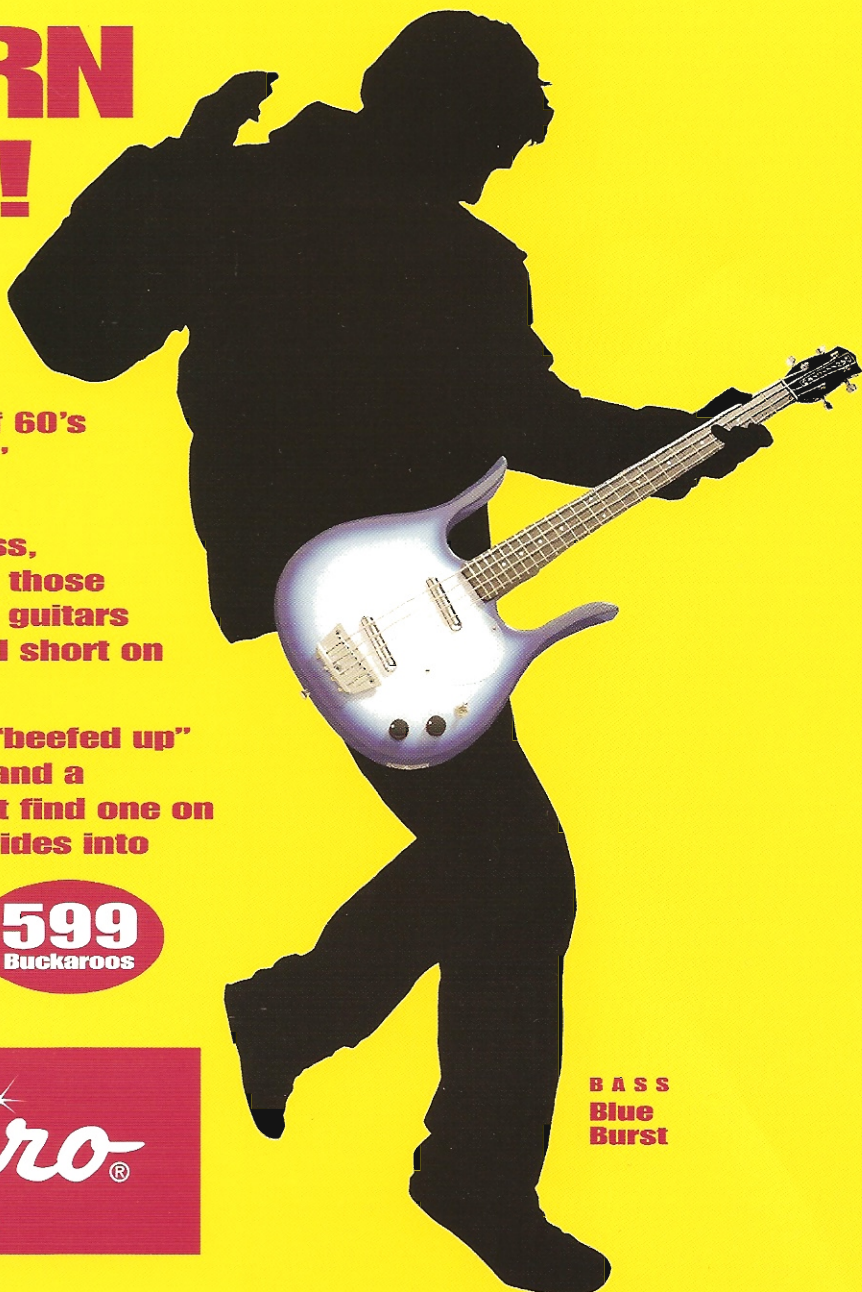

Back in '58 Danelectro invented the Longhorn... triggering a stampede of sorts, as artists rushed to record with this funky new bass. Hundreds of 60's era records feature its "squawky" signature sound.

Now the Longhorn is back...in Bass, Baritone and Guitar versions...for those who refuse to saddle up and ride guitars which are long on conformity and short on tonality.

All 3 Longhorns hit the trail with "beefed up" Lipstick® pickups, pro hardware, and a uniqueness such that you will not find one on the back of every cowpoke who rides into Dodge.

Limited quantities available... get yours ahead of the herd.
